Family Physiotherapy Centre (FPC) acquires Access at Home Physiotherapy

Ottawa, Ontario

Steve Brown PT (FPC President) is pleased to announce that FPC has acquired Ottawa based Access at Home Physiotherapy on January 10th, 2011. Access at Home Physiotherapy under the guidance of their founder and President Wendy Rogers PT has evolved to a point of being recognized as a leader in the delivery of home based physiotherapy care in Ottawa and throughout Eastern Ontario.

Mr. Brown noted that this merger further compliments FPC's mission of being able to deliver care to the community at large in a seamless and sustainable manner. Coupled with FPC's 10 Wellness Centres, the addition of a home care unit provides our clients with a value added service which we otherwise had to contract to 3rd party providers noted Mr. Brown.

Family Physiotherapy Centre will incorporate this acquisition into its current business model with the latter being branded as FPC's Home Rehab Unit.

"The synergies that this acquisition has will assist Family Physiotherapy Centre in being able to seamlessly reach out to the community beyond their Wellness Centre's/hospital convalescent programs/LTC and Retirement residences and into the home care community. We will be able to give chronic disease management the profile and support that is necessary to help people improve their quality of life and there is no end to encourage this population that a physiotherapist is a necessary professional that should be part of their personal health care team noted Ms. Rogers".

Mr. Brown concluded by confirming that Wendy Rogers PT and her entire team of professionals are in fact transitioning over to FPC with Wendy taking on the role of Manager of FPC's Home Rehab Unit.
